model of work roll wear in skin pass
february 24th, 2020 - skin pass
rolling or temper rolling is the
final operational step in the
production chain of hot rolled
strips and its main role is to apply
a small deformation to the hot
rolled strips cooled to room
temperature to improve the shape
quality and mechanical properties
because of the absence of rolling
lubricants between the work roll and
strip as well as the existence of
obvious oxide layer'**
